Trade Summary

December 2007: Middle East and North Africa External Trade – Key points

Goods trade summary

New Zealand's merchandise exports to the Middle East and North Africa increased by 16.9% for the year ended December 2007, and were valued at \$1,817.3 million. Agricultural products continue to be our largest export commodity, with exports of \$1.17 billion to our top five trading partners within the region, an increase of 18%. High world commodity prices for some key New Zealand exports have helped dampen the effects of the strong New Zealand dollar.

The total value of New Zealand's imports from the Middle East and North Africa for the year ended December 2007 was \$2,152.9 million, down 4.9% from \$2,264.6 million in the 2006 calendar year. Oil and oil products continue to be our main imports from the region.

Goods exports

- Saudi Arabia continues to be New Zealand's principal export market in the region, with exports valued at \$527.62 million, this represented a rise of 28.5% in the year to December 2007. Algeria and the United Arab Emirates were New Zealand's second and third largest export markets in the region, receiving \$245.65 million and \$221 million respectively. Exports to Oman, New Zealand's seventh largest trading partner in the region, increased significantly to \$89.69 million, a 61% increase on the previous year.
- The Gulf Cooperation Council (GCC) accounted for \$975.3 million or 53.7% of total exports to the region. The GCC states include Oman, Kuwait, Saudi Arabia, Qatar, United Arab Emirates and Bahrain. Exports to the GCC comprise predominantly dairy products and meat, but there is also strong growth in other sectors, such as forestry, horticulture, information and communications technology and education. New Zealand is currently negotiating a Free Trade Agreement with the GCC in an effort to increase trade ties between the represented nations.
- Jordan which is New Zealand's 12th largest export destination in the region experienced an export decrease of 60% for the December 2007 period. This was predominantly due to a fall in the quantity of milk and cream being exported to Jordan, which fell from \$50.5 million in the year to December 2006 to \$3.5 million in the year to December 2007.

Goods imports

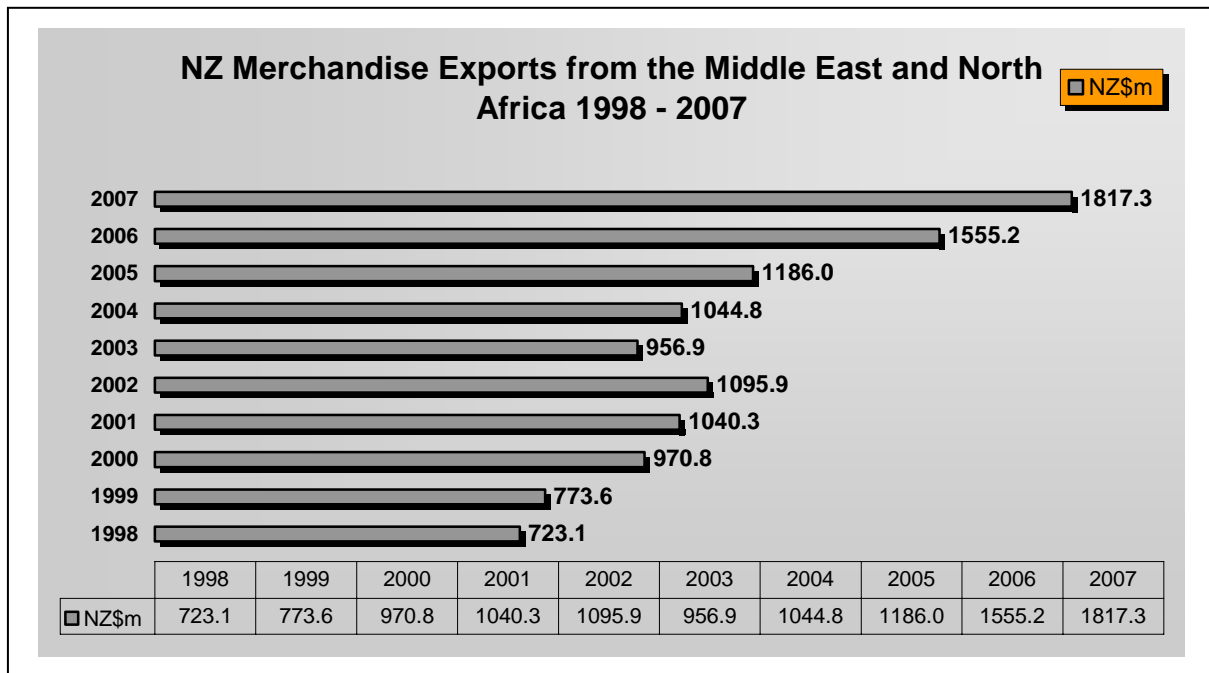

- The United Arab Emirates remained New Zealand's largest source of merchandise imports in the year ended December 2007 with imports valued at \$729.29 million, accounting for 33.9% of total imports from the region. This represented an increase of 26.5% from the year ending December 2006. Other major sources of imports in the region for New Zealand were Saudi Arabia \$541.13 million and Qatar \$409.73 million.
- Imports from the GCC were valued at \$1,755.1 million in the year ending December 2007 and accounted for 81.5% of total imports for the region. This represented a 23.5% increase from the year ending December 2006. Imports from the Mahgreb region of North Africa over the same period were valued at \$186.5 million and accounted for 8.6% of total imports from the region.
- Crude oil was New Zealand's most valuable imported product from the region with our top four trading nations totalling \$1.236 billion in the year ending December 2007, a decrease of 10.6%.

Visitors

- Visitor arrivals for the year ending December 2007 from both Israel and the United Arab Emirates, our two largest sources of overseas visitors from the region, numbered 5,920 and 4,903 respectively, both of which are up from the year to December 2006.
